

Design and manufacturing of UFOs by creating high-frequency magnetic fields or manufacturing of artificial anti-gravity

Gh. Saleh

Saleh Research Centre, Netherlands

Based on Saleh Theory magnetic waves have frequency in order of 10^{16} Hz and gravity in order of 10^{18} Hz.

Considering the chained structure of both magnetic and gravitational waves, if we can change the frequency of magnetic waves and increase it to about 10^{18} Hz (approximately 100 times), we can say that we have created artificial gravitational waves; Waves that have the ability to overcome gravity and interact with it. To create a frequency of 10^{18} Hz, the electrical energy relation can be easily used. If we increase the electric current 10 times, we can increase the frequency as much as hundred times. In this paper, by using this artificial Anti-Gravity we have provided a structure for making UFOs.
